

## Cross Border Community Eye Health Care Report 2019( October to December)

### 1.Introduction

The eye department we have more activity in karen state because the community know more about our eye program and we are getting more patients when we have clinic, in our finding we have discovered that many of our patient have eye problems, they do not have the money to go to the centre hospital that is why we have set up treatment programs in our state. The people come in clinic not only karen but sall the ethnic group in Burma.

The End of raining season and becoming dry season (September) our eye mission in karen state we start travel in jungle village and treated eye care again. The eye mission started first in HQ They bay tar the last week of September 2019 and them continue to other districts. The eye mission in HQ They Bay Tar we saw more people than in years before and the other district more and more people came. We did not have enough of the equipment we are limited.

1 .In October 10 to 15-2019 eye mission cross border clinic ( bang Klang) for 5 days. We treated many eye patients and other diseases. We are giving eye glasses to people but , as usual the supply of eye glasses is not enough. The number of people come to clinic total screening was 386.
